

**WE WILL BE RESUMING A LIMITED FACE-TO-FACE SERVICE FROM MONDAY
8th JUNE:**

Whilst we will be opening for some face-to-face appointments, we will not be resuming our full service just yet.

Treatments that produce a fine spray of particles, such as fillings, crown and bridge work, root canal treatments and composite bonding, will not be available until we can provide these services safely, or infection rates drop further.

We need to limit how many patients we have in the practice at one time and prioritise social distancing measures. For this reason, appointment times may be longer and availability less frequent.

Our team are working tirelessly behind the scenes to make sure we can open, safely, on 8th June. We are busy putting new protocols and safety measures into place to ensure we protect you, which is our first priority. We are unable to take appointment bookings until we have scrutinised all the details, so please bear with us whilst we put measures in place.

We are still providing our remote urgent care service via telephone, so if you are experiencing a dental emergency, please call one of our team on 01279 406100.

Make sure to check back here for any updates.

We look forward to seeing you soon!

Best wishes,
The Team at Keats House Dental Surgery
